

VICTORIA NATURAL HISTORY SOCIETY PRESENTS

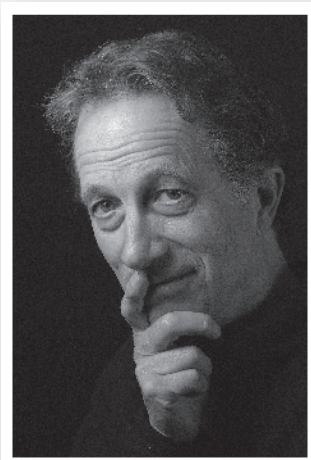

Brian Harvey

How I Stopped Worrying About Global Fisheries

Room 159, Fraser Building
UNIVERSITY OF VICTORIA

April 27, 2009 @ 7:30pm

Do you suffer from “doom overload”? Does science have the answers? What can one person do? Join biologist Brian Harvey, author of *The End of the River*, for an entertaining talk and slideshow about his experiences “taking science on the road” to aquatic biodiversity hotspots from British Columbia to Brazil.

“The End of the River is a brilliant and instructive book, alive with the author's seditious intelligence.”

— The Globe and Mail
